Edward Erwin's clear analysis addresses some of the fundamental questions on behavior therapy that remained in 1978 when this book was first published

What do we know about behavioral analysis and intervention in educational settings given that educational institutions were among the first to embrace the new technology of behavior change in the late 1950s and early 1960s it is apparent that we have had the opportunity to learn a great deal the evolution of the field of behavior therapy has witnessed a change in the behavior therapist from an adolescent fascination with repeatedly demonstrating the

effectiveness of the new technology to a mature recognition of the complex implications of the behavioral paradigm for individuals systems and society many facts now taken for granted were considered impossibilities a mere two decades ago in her 1986 presidential address to division 25 of the American Psychological Association Beth Sulzer-Azaroff reviewed a number of changes in attitude in education that were strongly influenced by behavior therapy most educators now agree that a everyone can learn b complex skills can be taught c precise general and durable performance can be taught and d barriers to learning can be overcome in addition we would add that behavior therapy is being applied to increasingly more complex human problems such as social skill deficits internalizing disorders and dysfunctional systems and organizations

The three volume encyclopedia of behavior modification and cognitive behavior therapy provides a thorough examination of the components of behavior modification behavior therapy cognitive behavior therapy and applied behavior analysis for both child and adult populations in a variety of settings although the focus is on technical applications entries also provide the historical context in which behavior therapists have worked including research issues and strategies entries on assessment ethical concerns theoretical differences and the unique contributions of key figures in the movement including B.F. Skinner Joseph Wolpe Aaron T. Beck and many others are also included no other reference source provides such comprehensive treatment of behavior modification history biography theory and application thematic coverage the first of the thematic volumes covers adult clinical applications adults are the most common population encountered by researchers clinicians and students and therefore more than 150 entries were needed to cover all necessary methods the second volume covers child clinical applications in 140 entries one especially useful aspect of this volume will be the complications sections addressing what can go wrong in working with children this is an area often overlooked in journal articles on the subject volume iii educational applications addresses a range of strategies and principles of applied behavior analysis positive behavior support and behavior modification and therapy these entries focus on classroom and school contexts in which the instructional and behavioral interactions between teachers and their learners are emphasized unique easy to follow format each of the volumes entries address a full range of mental health conditions and their respective treatments with the aim of providing systematic and scientific evaluation of clinical interventions in a fashion which will lend itself to the particular style of treatment common to behavior modification major entries for specific strategies follow a similar format 1 description of the strategy 2 research basis 3 relevant target populations and exceptions 4 complications 5 case illustration 6 suggested readings 7 key words biographical sketches include the following 1 birthplace and date 2 early influences 3 education history 4 professional models 5 major contributions to the field 6 current work and views 7 future plans readership this encyclopedia was designed to enhance the resources available to students scholars practitioners and other interested social science readers the use of in text citations jargon and descriptions of research designs and statistics has been minimized making this an accessible comprehensive resource for students and scholars alike academic and research librarians in the social sciences health and medicine will all find this an invaluable addition to their collections key features three thematic volumes and over 430 total entries five anchor articles in each volume provide context on major issues within the field key words and lists of suggested readings follow each entry contributions by internationally renowned authors from England Germany Canada Australia New Zealand and the United States volume editors volume i adult clinical applications Michel Hersen Johan Rosqvist Pacific University volume ii child clinical applications Alan M.
