the future is here self driving cars are on the streets an algorithm gives you movie and tv recommendations ibm s watson triumphed on jeopardy over puny human brains computer programs can be trained to play atari games but how do all these things work smart machines are no longer science fiction they are being used by businesses right

here and now and every day their capabilities are growing so exactly what is a smart machine everything you ve always wanted to know about smart machines other cognitive computing systems that are able to make decisions and solve problems without human intervention by the end of reading this book you will master the discussion about the following topics in smart machines 01 the rise of smart machines smart machines are built on top of the breakthroughs in computer science the advent of computers in the 20th century laid the modern groundwork for smart machines researchers analysts and technology leaders agree that smart machines will change our lives 02 smart machines definitions why did smart machines emerge now and not later general purpose technology gpt is an economics term for innovation smart machines are devices that can teach themselves how to do things smart machines are built on top of existing technologies the surge of progress in machine learning thanks to big data 03 artificial intelligence of smart machines defense advanced research projects agency darpa projects 04 cognitive computing of smart machines this categorization of cognitive computing and the discussion of the types of applications cognitive technologies are very good at analyzing large amounts of data and identifying anomalies 05 the real world examples of smart machines from deepblue to watson 06 smart machine technologies smart dust virtual personal assistants smart data discovery smart workspace conversational user interfaces smart robots commercial uavs drones autonomous vehicles autonomous vehicles 07 smart machines go to school to learn central to machine learning is the process of feeding training data into a mathematical prediction model the outlier cases are the best chances for learning 08 smart machines are wiser and smarter every day future machine learning and the large increase in available data and the rise of crowdsourcing 09 smart machines speak multi languages one particularly complex problem facing machine translation today is dealing with rare languages 10 artificial intelligence levels support for humans repetitive task automation context knowledge and learning self awareness 11 cognitive task types analyzing numbers words and images analysis performing digital tasks performing physical tasks 12 the great convergence the approach of key vendors to achieve the great convergence the attributes of cognitive architecture people will continue to have advantages over even the smartest machines 13 smart robotics from vision to reality

simultaneous localization and mapping funding the robotics projects robots navigate on planets developing robots for government and consumer oriented applications robots in japan robots deployment social acceptance of robots 14 the business benefits of smart machines smart machines will change the way work the use of smart machines in information technology 15 smart machines are efficient what do we really mean by machines replacing jobs 16 smart machines raise challenging questions the impact of smart machines on labor market machines get smarter and more independent and may not to our advantage 17 the future of smart machines the growing role of industry labs and federal agencies the advance of smart machines cannot be stopped so we must be ready for it

water is a vital resource and is widely acknowledged as such thus it often serves as an ideological and linguistic symbol that stands for and evokes concepts central within a community this volume explores thinking of water and concepts expressed through references to water within the symbolic system of the late persian early hellenistic period and as it does so it sheds light on the social mindscape of the early second temple community

i will tell you a story that will make you believe in god no story can guarantee being able to do this yet novelists can tell stories that make us think about what we believe about god and why despite repeated predictions of the death of the novel thousands of works of fiction are published and read in britain each year although western society is less religiously observant than it was many 21st century novelists persist in pursuing theological religious and spiritual themes make believe seeks to explain why with chapters offering analyses of novels from several genres so called literary fiction historical fiction science fiction fantasy and dystopia david dickinson discusses a wide spectrum of novelists authors who are avowedly atheistic and authors who have a vested interest in perpetuating biblical stories are both featured well known writers such as rushdie mcewan mccarthy and martell rub shoulders with some you may be meeting for the first time appealing to literature students and people who simply enjoy reading whether christian or not this study of god in novels invites us to open our minds and allow aspects of our culture to shape our understanding of god and to

change our ways of talking about the divine

lament mourning and the transmissibility of a tradition in the aftermath of destruction are prominent themes in jewish thought the corpus of lament literature building upon and transforming the biblical book of lamentations provides a unique lens for thinking about the relationships between destruction and renewal mourning and remembrance loss and redemption expression and the inexpressible this anthology features four texts by gershom scholem on lament translated here for the first time into english the volume also includes original essays by leading scholars which interpret scholem s texts and situate them in relation to other weimar era jewish thinkers including walter benjamin franz rosenzweig franz kafka and paul celan who drew on the textual traditions of lament to respond to the destruction and upheavals of the early twentieth century also included are studies on the textual tradition of lament in judaism from biblical rabbinic and medieval lamentations to contemporary yemenite women s laments this collection unified by its strong thematic focus on lament shows the fruitfulness of studying contemporary and modern texts alongside the traditional textual sources that informed them

the definitive guide to llms from architectures pretraining and fine tuning to retrieval augmented generation rag multimodal ai risk mitigation and practical implementations with chatgpt hugging face and vertex ai get with your book pdf copy ai assistant and next gen reader free key features compare and contrast 20 models including gpt bert and llama and multiple platforms and libraries to find the right solution for your project apply rag with llms using customized texts and embeddings mitigate llm risks such as hallucinations using moderation models and knowledge bases book description transformers for natural language processing and computer vision third edition explores large language model llm architectures practical applications and popular platforms hugging face openai and google vertex ai used for natural language processing nlp and computer vision cv the book guides you through a range of transformer architectures from foundation models and generative ai you ll pretrain and fine tune llms and work through different use cases from summarization to question answering systems leveraging embedding based search you ll also implement retrieval

augmented generation rag to enhance accuracy and gain greater control over your llm outputs additionally you ll understand common llm risks such as hallucinations memorization and privacy issues and implement mitigation strategies using moderation models alongside rule based systems and knowledge integration dive into generative vision transformers and multimodal architectures and build practical applications such as image and video classification go further and combine different models and platforms to build ai solutions and explore ai agent capabilities this book provides you with an understanding of transformer architectures including strategies for pretraining fine tuning and llm best practices what you will learn breakdown and understand the architectures of the transformer bert gpt t5 palm vit clip and dall e fine tune bert gpt and palm models learn about different tokenizers and the best practices for preprocessing language data pretrain a roberta model from scratch implement retrieval augmented generation and rules bases to mitigate hallucinations visualize transformer model activity for deeper insights using bertviz lime and shap go in depth into vision transformers with clip dall e and gpt who this book is for this book is ideal for nlp and cv engineers data scientists machine learning practitioners software developers and technical leaders looking to advance their expertise in llms and generative ai or explore latest industry trends familiarity with python and basic machine learning concepts will help you fully understand the use cases and code examples however hands on examples involving llm user interfaces prompt engineering and no code model building ensure this book remains accessible to anyone curious about the ai revolution

over one hundred presentations from the 36th annual charleston library conference held november 1 5 2016 are included in this annual proceedings volume major themes of the meeting included data visualization streaming video analysis and assessment demand driven acquisition and open access publishing while the charleston meeting remains a core one for acquisitions librarians in dialog with publishers and vendors the breadth of coverage of this volume reflects the fact that this conference is now one of the major venues for leaders in the publishing and library communities to shape strategy and prepare for the future almost 2 000 delegates attended the 2016 meeting ranging from the staff of small public library systems to the ceos of major corporations this fully indexed copyedited volume provides a rich source for the latest evidence

based research and lessons from practice in a range of information science fields contributors comprise leaders in the library publishing and vendor communities

jesus warned the world would hate christians if the world hates you know that it has hated me before it hated you john 15 18 as cultural hostility toward christianity intensifies many christians have grown more reluctant to advocate for biblical values in the public square but our perseverance for the common good a good defined by god alone is more important than ever in a culture that embraces darkness when culture hates you is a call for christians to unashamedly pursue righteousness in society out of our love for others in this timely resource author natasha crain will help you make sense of cultural hostility by better understanding the roots of secular outrage on issues like christian nationalism social justice abortion transgenderism and sexuality advocate for the godly functioning of society with greater biblical cultural and civic understanding take concrete action for the common good with more than 35 practical ideas to get you started as christians our calling is to speak truth in the face of hostility not because we want to war with culture but because we love both god and others

these hands on exercises teach you how to define a site work with tables to lay out pages create javascript rollovers create frames use cascading style sheets effectively and much more this book comes complete with insider tips is illustrated with detailed graphics and accompanied by a cd loaded with classroom proven exercises and quicktime movies
